Tel: 843-953-8046
Meeting Times: M/W 9:25-10:40 AM ECTR 215
Office Hours: M&W: 12-3:30PM or by appointment

Course Description: This course focuses on the alliance of factual knowledge, procedural proficiency, and conceptual understanding. The parallels of learner development and the progressive nature of mathematics content standards are explored. Teacher candidates will study the elements necessary to help P-8 students achieve high-quality mathematics instruction.

More specifically, in accordance with SC State/Common Core State Standards and National Standards for mathematics, teacher candidates will explore numbers and operations, geometry, measurement, data analysis and probability, and algebra. Problem solving, reasoning, multiple representations, connections, and communication are stressed throughout the course coverage of these content areas, facilitating the development of deep conceptual understanding. At the successful completion of the course, teacher candidates will be equipped to teach their future elementary- and middle-school students in a variety of ways such that their students understand mathematics procedures and why mathematics concepts make sense.

Required Text:

5. Common Core Standards available on the wiki or at http://www.corestandards.org/

Outcomes for Candidates:

TCs (Teacher candidates) will develop the understanding of how students learn to construct
mathematical ideas from the concrete early childhood experiences through the development of abstract thinking abilities in young adolescence. SOE I; NCATE 1; NAEYC 4b; NMSA 1.K1, 1.P2, 1.P4, 5.K4

<table>
<thead>
<tr>
<th>TCs will articulate a vision of school mathematics that supports access of all students to a curriculum that emphasizes important mathematical concepts; effective and engaging research-based instructional practices; and high expectations with appropriate accompanying accommodations. SOE II, III; NCATE 2d, 3d; NAEYC 4b; NMSA 1.D3, 5.D7</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCs will convey an appreciation for the discipline of mathematics including its history and the contributions of diverse cultures to the field. SOE II, VII; NCATE 2d</td>
</tr>
<tr>
<td>TCs will articulate the knowledge that mathematics curriculum must be coherent and focused on important useful concepts that are connected within the discipline and across disciplines. SOE II; NCATE 2d, 2i, 3a; NAEYC 4b; NMSA 4.K2</td>
</tr>
<tr>
<td>TCs will recognize the importance of the role of student ideas, interests, and needs in the design, implementation, and evaluation of mathematically-based learning experiences. SOE I; NCATE 2d, 3a, 3d; NAEYC 4b; NMSA 3.K5, 3.D4, 4.P3</td>
</tr>
<tr>
<td>TCs will demonstrate an understanding of the need for a variety of instructional strategies to effectively address developmental, ability and learning style needs of PK-8 students exhibiting diversity in its many forms. SOE III; NCATE 4; NAEYC 1, 4b; NMSA 1.P5, 1.P10, 4.K3, 5.K2</td>
</tr>
<tr>
<td>TCs will develop the knowledge of, and dispositions that value, ongoing, systematic, formal, and informal assessment as an integral part of instruction that guides and enhances learning. SOE VI; NCATE 4; NAEYC 3, 4b; NMSA 1.P6, 5.K8, 5.D5, 5.P4, 6(all)</td>
</tr>
<tr>
<td>TCs will communicate about and through mathematics verbally and in writing using both everyday language and mathematical representations. SOE II; NCATE 2d, 3e; NAEYC 4b; NMSA 4.K4, 4.D4, 4.P5</td>
</tr>
<tr>
<td>TCs will demonstrate knowledge of the organization of the content standard areas of number and operations, algebra, geometry, measurement, data analysis and probability within the PK-8 mathematics curriculum as prescribed by the NCTM and the SC Standards. SOE II; NCATE 2d; NAEYC 4b; NMSA 4, 6.K5</td>
</tr>
<tr>
<td>TCs will demonstrate the value and integrative nature of the process standards of problem solving, reasoning, communication, connections, and representations within the PK-8 mathematics curriculum as prescribed by the NCTM and the SC Standards. SOE II; NCATE 2d, 3c; NAEYC 4b, 4c; NMSA 4, 5.K3, 5.P2, 6.K5</td>
</tr>
<tr>
<td>TCs will demonstrate competency in, and an understanding of the value of, a breadth and depth of mathematical knowledge and skills that extend beyond the level for which the candidate is preparing. SOE II; NCATE 2d; NMSA 4.K1, 4.P2</td>
</tr>
</tbody>
</table>

**Course Assignments/Evaluation:**

It will be possible to earn 500 points during the semester. They will be distributed as follows:

<table>
<thead>
<tr>
<th>Assignment Description</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test (4)</td>
<td>120 (24%)</td>
</tr>
<tr>
<td>Comprehensive final test (1)</td>
<td>100 (20%)</td>
</tr>
<tr>
<td>Lesson &amp; Class demonstration (1)</td>
<td>30 (6%)</td>
</tr>
<tr>
<td>Standards Project</td>
<td>50 (10%)</td>
</tr>
<tr>
<td>Homework (5)</td>
<td>90 (18%)</td>
</tr>
</tbody>
</table>
Article critique(1): 50 (10%)
Attendance 30 (6%)
Journals (3) 30 (6%)
Total 500 (100%)

Test:
There will be four tests (6% each) and a final comprehensive test (20%).

Text:
There is a large quantity of excellent information and sample problems in the text. Because it will be impossible to discuss all of these valuable resources in class, students are expected to read the material and be familiar with the text exercises.

1. Reading Checks/ . Homework Assignments
There will be daily/biweekly or weekly reading. The assigned readings will require you examine various aspects of P-8 mathematics in light of the NCTM’s Principles and Standards for School Mathematics and SC State Standards as well as content based math problems and other relevant readings/assignment from the class text and online resources. You will be required to submit the homework assignments on due dates. You must come prepared to class! Impromptu quizzes will be given to test your knowledge of assigned readings.

2. Standards project
   1. Retrieve math curriculum standards from the http://ed.sc.gov (State Department of Education Website). Click the Grade Band Format of K-8 Academic Standards for Mathematics link.
   2. Review and include the corresponding Common CORE Standards. South Carolina will implement them during the 2013-14 academic year! Website: http://www.corestandards.org/about-the-standards see also files on pbwiki.
   3. Save the standards for K-8 grades.
   4. Select one Grade Band standards. Example, K-2, 3-5 or 6-8
   5. Copy the standards, indicators and objectives for the grade band you have selected.
   6. For the chosen grade band do the following:
      a. Choose a content area (number and operations, algebra, geometry, data analysis and probability or measurement).
         i. Choose one standard that is developed throughout the grade band. Example (standard, K-2, 1-2 & 2-1—or standard 2 at Kindergarten, grade 1 and grade 2).
         ii. Choose 2 indicators that develop in difficulty across the grade band
      b. Describe clearly how YOU will take these objectives/indicators for the chosen content area and teach

<table>
<thead>

<th>Grade 1</th>
<th>Grade 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

the concepts indicated through the grade band.
Examine the Common Core State Standards

For example, K2.3, 1.2.5 and 2.2.4 indicators/objectives. The concept difficulty increases across the grade band. Describe how you will plan to teach these concepts with an increasing difficulty across the grand band that you choose? What will you do in class to meet your objectives.

c. Give at least one activity per grade and explain how each of these activities facilitates or enhances the learning of those/those concept(s).

7. Plan a lesson for one of the grades within the grade bands. Use the lesson format described in this syllabus.
   a. Provide clear description of the teacher’s role and students’ role
   b. Outline the activities giving step by step procedures.
   c. Incorporate visual models and communication in the lesson and clear explanations of why they were included in this session.

3. Journal Article Critique. You will write a critique of an article from *Teaching Children Mathematics*. The college of Charleston library has copies of this journal. Your argument should focus on important contemporary issues in mathematics education relevant to schools in South Carolina. As you may know, *Teaching Children Mathematics* (TCM) is an official journal of the National Council of Teachers of Mathematics (NCTM) and a forum for the exchange of ideas in curriculum, instruction, learning, and teacher education. The primary audience of TCM is elementary school teachers, and, as you will see, the journal contains many articles with ideas that are directly applicable to the classroom. Individuals with an interest in upper elementary and middle grades education should also look at
Mathematics Teaching in the Middle School (MTMS) and are welcome to complete a critique from an article in that journal. You may join NCTM online at http://www.nctm.org/membership/content.aspx?id=7618. You will be able to receive either journal online.

The objective of having you look at the journals is to get you familiar with them as resources for teaching elementary school mathematics and middle school mathematics. You are to critique an article from either TCM or MTMS. The critique should be from a "main" article -- one that is at least 3 pages long and focuses on an issue (example, math strategies that work etc, this is just an example). There are very many important math issues, best practices etc. (Editorials, reviews, and other short essays are informative but I want you to look at more extensive articles.) The journals are available in the library and you may select any main article from the last 4 years. The May issue each year contains a subject index and you are welcome to select an article on a topic that is of particular interest to you. The critique should be approximately two pages in length (word processed, double-spaced or the hand written equivalent) and focus on a (or the) major issue raised in the article. Remember to clearly state which article you are reviewing and include the volume and issue number of the journal. Finally, please attach a copy of the article.

When reading your critique, I will look for the following three components:

1. A brief summary of the message the author wishes to convey (provide enough detail to allow the reader of your critique to understand your comments – it is better to fully describe key points and omit lesser points than it is to mention lots of points and leave the reader wondering which of those were the most important)
2. Your opinions about the strengths and/or weaknesses of the message (be careful to note which of the comments you make are from the author and which are your reactions to the author)
3. How you will think or teach differently after reading the article (or reasons why the article will have no effect on your teaching).

Grading criteria for this assignment:

Substance of the critique:
Does the critique
- show evidence that you have understood the central message contained in the article?
- identify strengths and/or weaknesses in the article, or at least comment on the author's ability to portray her or his message?
- show in-depth reflection on the author's message and the implications of that message for you?

Composition skills:
Does the critique
- communicate your ideas clearly?
- contain carefully formed sentences and paragraphs?
- contain a well-structured flow of ideas?

Preparation of manuscript:
Does the critique
- show evidence that you read and carefully revised your work?
- show that you took care to eliminate spelling and grammatical errors?
- indicate care in the general appearance of the paper?

Points will be assigned as follows:
1. 31-32 points: An unusually insightful critique which includes a very clear summary, easy to follow reaction to the key points, and clear, honest commentary about the implications of the article for you.
2. 29-30 points: A thoughtful and carefully prepared critique showing some very keen insights and reflections.
3. 27-28 points: A well prepared paper that captures the essence of the ideas in the manuscript and provides reasonable reaction to them.
4. 25-26 points: A critique which is on the right track but misses important details or shows only minimal insight into the implications of the article.
5. 12 or fewer points: A critique that fails on more than one of the above criteria.
4. Lesson Presentation
Plan a short lesson (5 minute maximum) to teach your peers. This should be presented as you would teach it to the students in the selected grade cluster. Plan to organize and implement the lesson using all of the appropriate materials necessary.

Lesson plan Format

Name___________________________________
Date_________________
Grade level__________

Standards: Clearly state the content and process standards to be addressed (using the state of South Carolina Standards and Common Core standards)

Concepts: Clearly state the concepts/ skills and standards that the lesson will address.

Source of idea: Textbook or resource used for your lesson.

Objective: Clearly state what students will be able to do at the conclusion of the lesson.

Materials: List all manipulatives, tools, or other materials needed by the teacher and by the students.

Motivational activity: Describe the introductory experience that will quickly engage students in the lesson. Possible activities: a real word problem that connects topic to something relevant; questions: What if? What if-not? Tell me everything you know about quadrilaterals.

Main lesson activity: Describe the significant elements of the lesson. Include what you will be doing (including examples you plan to use), what the students will be doing, and what mathematical concepts you will be addressing.

Closing activity: Describe a summarizing experience that will enable the students to consolidate what they have learned and for you to determine the extent to which they have achieved your objective. (Assessment activity). Note: Each lesson should actively involve the students.

10. You displayed professional behavior.  
(4p) ______

Total  
(45p) ______
5. Homework: There will be 5 HW covering the material assigned; at least three of them will be done during the class time.

6. Journals: You should maintain a journal throughout the semester. The journals should be posted before the beginning of the class on the class wiki.

7. Tests: You will have 4 tests and one final test. Tests will be based on content for the Praxis as well as warm-ups, content, class discussions, the NCTM and SC Standards, and any other material designated by the instructor.

Due Dates: All assignments must be turned in at the beginning of class on the due date. Late assignments will be assessed a penalty of one letter grade per 24 hours they are late. DO NOT give assignments to School of Education personnel. No credit will be given for homework assignments completed during class time UNLESS the homework is to be completed in class. Assignments will NOT be accepted via email.

EDEE/TEDU Attendance Policy
- Allowable absences: 3 absences
- Students will be tardy if they arrive in class within the first 10 minutes after class has started.
- Three tardies result in one absence.
- Students will be absent if they arrive after 10 minutes or if they leave class early for any reason.
- Students who exceed allowable absences will be dropped with a WA. WA becomes an F on a transcript.
- If a student exceeds allowable absences due to extenuating circumstances beyond the student’s control, a panel of professors from that semester will review the circumstances and make a final decision.
- SNAP students must see the professor within the first two weeks of the course if they wish special accommodations.
- Athletes who will miss class due to athletic events must see the professor within the first two weeks of the course and submit athletic schedule for the semester, identifying classes that will be missed. No other absences will be allowed for athletes who miss the maximum allowable absences due to athletic events.

Written and Oral Communication: You are expected to use correct grammar at all times. Points will be deducted on written assignments for grammatical errors. All references must follow the American Psychological Association (APA) Guidelines for Term Papers. Electronic guidelines may be found on Web. The Owl at Purdue is an excellent APA resource. http://owl.english.purdue.edu/owl/resource/560/01/ The Writing Lab is located on the first floor of Addlestone Library (M-R: 9 to 9 and F: 9 to noon). Further, it is imperative that you use correct grammar in all oral communication, especially during field experience. Classroom teachers, your
student peers and I will all collaborate to eliminate all oral grammatical errors, using an approach of constructive criticism.

**CofC Honor System:** Academic honesty and integrity are highly regarded in this class and are assessed on several levels. As a student at the College of Charleston you have agreed to uphold the policies outlined in the Student Handbook: A guide to civil and honorable conduct both in your coursework and as a representative of the College in field experiences and clinical practice situations. Violations to the Code of Conduct outlined on pages 10-11 in the Student Handbook will be reported to the Honor Board. Additionally, violations may affect course grade. As EDEE is a dual program, in that we recommend candidates for teacher certification, professors reserve the right to document violations that would impact student certification (e.g., attendance problems in field experiences and clinical practice, professionalism in schools).

**ADA Accommodations:** In compliance with the Americans Disabilities Act (ADA), all qualified students are entitled to “reasonable accommodations.” The instructor must be notified during the first week of class of any accommodations needed.

**Course Outcomes:** All teacher preparation programs in the School of Education (SOE) are guided by a commitment to Making the Teaching Learning Connection through three Elements of Teacher Competency which are at the heart of the SOE Conceptual Framework: 1) understanding and valuing the learner, 2) knowing what and how to teach and assess and how to create an environment in which learning occurs, and, 3) understanding themselves as professionals. These three competencies underlie all learning and assessment in this course, helping you develop the knowledge, skills, and dispositions necessary to become an effective teacher.

Course outcomes are derived from the standards set forth by NCME (National Council of Measurement in Education). The standards listed in parentheses at the end of each course outcome relate to those of the SOE, NAEYC (National Association for the Education of Young Children), NCATE (National Council for the Accreditation of Teacher Education), and NMSA (National Middle School Association). These standards define, respectively, expectations for the School of Education, early childhood teachers, elementary teachers, and middle grades teachers. The following outcomes are organized by the Elements of Teacher Competency:
**Course Requirements:**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Demonstration of SOE Dispositions and how they are expressed in this course:</td>
<td>• Belief that all students can learn <em>(participation and attitudes expressed about students and learning)</em></td>
</tr>
<tr>
<td></td>
<td>• Value and respect for individual differences <em>(inclusions/accommodations included in unit and plans)</em></td>
</tr>
<tr>
<td></td>
<td>• Value of positive human interactions <em>(participation in class, group discussion &amp; other collaborative work)</em></td>
</tr>
<tr>
<td></td>
<td>• Exhibition and encouragement of intellectual curiosity, enthusiasm about learning, and willingness to learn new ideas <em>(participation in class and group discussions; performance on formative and summative assessments)</em></td>
</tr>
<tr>
<td></td>
<td>• Dedication to inquiry, reflection, and self-assessment <em>(performance on formative and summative assessments; active participation in class and group discussions)</em></td>
</tr>
<tr>
<td></td>
<td>• Value of collaborative and cooperative work <em>(provision for thoughtful, constructive critiques of others’ work)</em></td>
</tr>
<tr>
<td></td>
<td>• Sensitivity toward community and cultural contexts <em>(inclusions &amp; modifications of lessons &amp; in long and short range plans)</em></td>
</tr>
<tr>
