CATALOG COURSE DESCRIPTION:  
This course provides an introduction to the historical, political, sociological, and philosophical foundations of education. Emphasis is on the complex relationship between society and school. Issues regarding race, class, gender, and culture within the educational system are addressed in the context of fostering educational opportunity and ameliorating inequalities. A historical context also is established which allows for critical examination of events, individuals, and ideas that have influenced the development of education in the United States. Through an integration of knowledge in the foundations of education, the course prepares reflective decision-makers who can critically examine various schools of philosophical thought and political issues related to education.

While the course is asynchronous in format and you will be working from different locations, interaction within the discussion boards is an essential part of the learning process for this course.

**Class Attendance**

Participation in asynchronous class discussions is expected each week with at least two responses to discussion posts made by others in the course.

**Assignments**

In this course, you will have readings and videos to view, discussions to participate in and projects to complete. You will be working on several of these assignments throughout the course. As the course progresses, you will be reminded of the due dates. Please do remember that it will be your responsibility to keep up with the assignments. All assignments are to be turned in on time. Late assignments may be assigned lower grades and after a point, not accepted at all. See Assessment, Assignment Instructions, and Grading Rubrics information that is included below. Contact me if you have concerns or need help completing the work.

**Field Experience**

Field experience hours are a required part of this course. Students may not receive a passing grade without completing the required field experiences. A summary field experience reflection is due at the end of the experience. More information about the field experiences are found below.

**Information about Discussion Posting** (per The Citadel's On-line Faculty Academy)

Discussion Answer Postings: "This category reflects the quality of a student's answers that contribute in a meaningful way to producing a fruitful learning environment for all participants. The criteria for grading answers can vary based upon the nature of the question, but the following are helpful tips to use, as applicable, to particular questions:

1. Ensure that you answer the question(s) being asked, as well as all parts of the question. So, read the question carefully.
2. Explicitly cite relevant concepts.
3. Apply concepts to offer an in-depth explanation, i.e., state why your answer makes sense.
4. Cite examples from real life cases, your experience, or things you've read.
5. Compare and contrast varying views on an issue."

Discussion Replies: "This category reflects the quality and quantity of a student’s replies to the answers that others have posted. In order to receive any credit, replies must be substantive and relevant to the corresponding answer. Effective replies offer some reflection upon the specific ideas in the answers posted by others. See items 1-5 in Discussion Answer Postings above for ideas when you’re unsure how to reply to an answer. No credit will be given for replies that simply state things like the following: I agree, nice job, well done, and the like, i.e., if a particular reply could apply to any answer, anywhere, then it is inadequate. The reply should have information that relates to the particular answer to which it pertains. At least two replies are required for each discussion throughout the course, unless otherwise specified. Everyone must reply in each discussion, including those who are assigned to answer the question..."
